DAVID ALBRIGHT

Objective

To obtain a position in an organization with a dynamic business strategy in an international setting

Work History

06/03 – Present

Anteon Corporation – Annandale, VA - I support the Foreign Military Sales (FMS) Program Management Database (PMD) for Canada, Finland, Kuwait, Malaysia, Spain, and Switzerland for the FA-18A/B/C/D/E/ aircraft weapon system and I support the FMS PMD E-2C for Egypt, France and Taiwan aircraft for the intranet and Web applications that comprise the primary PMD application product. In addition, I provide support in all facets of the Program Management (PM), Business Financial Management (BFM), Avionics & Structural Engineering, Electronics Weapons (EW), and Integrated Logistics Support (ILS) functions as they are applied to PMD. My responsibilities include but are not limited to maintaining, troubleshooting, analyzing, developing, and performing tests and evaluations on hardware integration, and software applications. In addition, I have the knowledge and experience to analyze and prepare technical reports and correspondence related to hardware, software and security documentation, functions, and requirements. I execute hardware and software configuration control and recommend material requisitions to maintain state-of-the-art database management systems. I perform daily evaluations of resources to minimize system downtime and ensure product quality. The development environment is Lotus Notes/Domino with an emphasis towards the web.

11/99 – Present

MAD Technology Services (MAD) – Waldorf, MD - During my 4 years with MAD, I was classified as a Senior Consultant and had a Management role with the Company. I was able to work on multiple high level contracts in several different roles. My experience ranged from creating a custom Customer Service Portal for Washington Gas & Light, to helping complete a Global Recruiting website for McKinsey & Company. I was also instrumental in creating a corporate tax extranet repository for PricewaterhouseCoopers (including a Japanese language site). All projects were created with Lotus Notes/Domino technologies and complemented with other internet technologies such as HTML, JavaScript and Macromedia Fireworks to name but a few. I was also able to participate in the Full-Lifecycle development for many of these projects. Internally, I was able to create a wireless network infrastructure that allows employees to work throughout the office space with the flexibility required by company directive. I continue to work projects for MAD

9/99 – 10/99

TRIAD Management Services – Rockville, MD - My assignment with TRIAD was to modify functionality for one of the Department of Justices' Lotus Notes based systems to meet Y2K standards. I also updated some of the functionality of the system using custom LotusScript code.

7/97 – 7/99

Statoil Energy, Inc. - Alexandria, VA - Having a leadership role with the Groupware department within Statoil Energy, I was able to instill solid Full-Lifecycle Development Standards. I was responsible for an extremely wide range of functions including electronic data processing, developing applications software interface programs, computer aided graphics, reports, data bases, and illustrations to support various aspects of major programs**.** I helped bridge the gap that existed between the IT staff and internal customers as well as create rapport with Statoil Energy's counterparts in both Norway (Global Headquarters) and the UK. During my time with Statoil, I worked on many projects including the internal Y2K project, a corporate wide Business Process Re-engineering project reporting directly to the CFO, help set up new Voice Over IP Telecommunications Infrastructure to help save on cost with communicating with Norway, and an Electricity Management System for the Electricity Traders department. Most projects were created using Lotus Notes/Technologies. The Business Process Re-engineering project allowed us to make recommendations on new strategies for hardware integration, new software development and resource management.

4/96 – 7/97

Noblestar Systems Corporation - Falls Church, VA - As a consultant for Noblestar, I worked directly with several clients in creating custom Lotus Notes/Domino systems. Systems included a subscription based e-commerce website containing US Tax information, including Federal and State Tax forms and information pertaining to new Tax Laws as well as creating a Lotus Notes system to enroll and to track potential users of experimental Drugs such as Avonex (used in the treatment of Multiple Sclerosis). I was responsible for an extremely wide range of functions including electronic data processing, developing applications software interface programs, computer aided graphics, reports, data bases, and illustrations to support various aspects of major programs. My clients included Thompson Publishing Group and Corning HTA/Covance.

2/95 – 3/96

Matrix Consulting, Inc. – Hackensack, NJ - During his time with Matrix Consulting, I worked primarily with Bristol-Myers Squibb. There, I analyzed, managed, and co-developed a consultant contracting system that automates the consultant hiring process for BMS and their vendors. System manages the workflow process from the initial requirement, through approval, posting to a bulletin board for vendor response, credentials verification and hiring notification. User training and documentation was provided. I also managed and co-developed and implemented a workflow system to maintain company policies and procedures.

11/93 – 2/95

Computer Associates International, Inc – Reston, VA - While working for Computer Associates, I was assigned to work directly with the U.S. Department of the Treasury in designing a system to generate payments, process claims against payments, reconcile checks, oversee collections, process accounting transactions, manage trust funds, and to manage daily cash flow using Computer Associates' CA-IDEAL, a mainframe based system.

Professional Organizations and Activities
